**Subject**  
 Installation of the qgis\_umesh plugin in QGIS 3.10 on a Windows 10 PC.

**Copy to**  
 —

---

## 1 Installation

- Copy the qgis\_umesh.dll to the C++ plugin directory of QGIS. In my development installation it is: <c:\OSGeo4W64\apps\qgis\plugins\qgis\_umesh.dll>.
- Install the icons on the program files directory <c:\Program Files\Deltares\qgis\_umesh\icons>
  - file\_open.png
  - map\_output.png
  - plotcfts.png
  - remote\_olv.png
- Install the program PlotCFTS on the program files directory <c:\Program Files\Deltares\plotcfts>

### Some notes

- The qgis\_umesh.dll need the following dll's, so they should be in the %PATH%-environment variable:
  - qt5core.dll
  - qt5gui.dll
  - qt5widgets.dll
- Next dll's are probably already placed in the %PATH%-environment variable when installing QGIS:
  - qgis\_core.dll
  - qgis\_gui.dll
